Practical 2: Include output screen. The code should be annotated with comments.pdf format

Write a program to accept the Shopping amount and apply discount on it

```
#Total Shopping Amount
Sp= int(input("Total Shopping Amount : "))

#apply discount
if Sp>=5000 :
  print("You have got 50% off :",Sp*.50)
  print("Dicounted Amount is :",Sp-(Sp*.50))
elif Sp>=2000 :
  print("You have got 25% off :",Sp*.25)
  print("Dicounted Amount is :",Sp-(Sp*.25))
elif Sp>=500 :
  print("You have got 10% off :",Sp*.10)
  print("Dicounted Amount is :",Sp-(Sp*.10))
elif Sp>0 :
  print("No Dicount apply")
else : print("Amount is Invalid !!!")
```

```
Total Shopping Amount : 2468
You have got 25% off : 617.0
Dicounted Amount is : 1851.0
```
